

Yard Helper I/II

This position combines responsibility for maintaining log deck sprinkler systems with general maintenance and operational support.

Key duties and responsibilities include:

- Sprinkler System Maintenance:
 - Maintaining all log deck sprinkler systems, including monitoring pump stations and the diversion inlet.
 - Daily maintenance of sprinkler systems, requiring safe movement and manipulation of sprinkler pipes on log decks.
- Log Deck Safety and Operations:
 - Recognizing and addressing hazards on the log deck, such as loose bark and unstable logs.
 - Assisting log scalers with taping loads of logs.
- Dust Control and Plant Maintenance:
 - Driving a manual transmission water truck for dust control throughout the plant area.
 - Weighing log trucks using certified scales and cleaning debris from the scale platform.
 - Maintaining the landscape water system and well pump oil reservoir level.
 - Cleaning the office and maintenance areas, including weed eating around the company location.
- Equipment Operation and Maintenance:
 - Safely operating a quad (ATV) as needed.
 - Operating a chainsaw to buck logs.
 - Performing basic mechanical tasks to assist with water truck and other equipment maintenance.
- Teamwork and Communication:
 - Learning and assisting with other crew responsibilities to ensure efficient daily operations.
 - Inventorying the tool room and communicating supply needs to the supervisor.

- Communicating effectively with crew members, supervisors, and the maintenance shop.
- Physical and Environmental Demands:
 - Working in various weather conditions, including hot and cold environments.
 - Performing physical activities such as kneeling, bending, stooping, climbing, twisting, crouching, and reaching, with a full range of motion.
 - Walking long distances on uneven surfaces, including log decks.
 - Lifting, pushing, and pulling objects weighing 50-100 lbs.

Job Qualifications and Requirements:

- Ability to safely drive a manual transmission vehicle.
- Commitment to working safely and maintaining constant awareness of surroundings.
- Physical ability to perform tasks requiring kneeling, bending, stooping, climbing, twisting, crouching, reaching, and a full range of motion of limbs and neck.
- Capacity to work in various weather conditions, including hot and cold temperatures.
- Proficiency in performing pre and post-operational checks on equipment.
- Ability to check and maintain landscape water systems and well pump oil reservoir levels.
- Eagerness to learn new responsibilities and contribute to the crew's daily operations.
- Ability to inventory supplies and communicate needs to the supervisor.
- Strong communication skills for interacting with crew members, supervisors, and the maintenance shop.
- Physical fitness to walk long distances on uneven surfaces, including log decks.
- Competence in operating a chainsaw safely.
- Strength to lift, push, and pull 50-100 lbs.
- Availability to work overtime, weekends, and holidays as required.
